Luxon Engineering Adds CFD Capabilities

Altair Engineering acquired Acusim, a leading computational fluid dynamics (CFD) software company on January 11,

2011 (http://www.altairhyperworks.com/newsdetail.aspx?news_id=10498). This Acquisition brings more power to the Altair HyperWorks suite and gives the engineers at Luxon Engineering access to a robust and powerful CFD solver. We now have the capabilities to solve CFD problems the previously needed to be outsourced which leads to faster and more affordable product development and engineering services.
